

# K 540

HI-FI STEREO AROUND-EAR HEADPHONES

**AKG**<sup>®</sup>  
by HARMAN

## HIGHLIGHTS

- EASY-TO-REPLACE, WASHABLE EAR PADS
- SINGLE OXYGEN-FREE CABLE FOR A COMFORTABLE FIT AND OPTIMUM AUDIO QUALITY
- UNBREAKABLE METAL ARCHES
- 2-D AXIS FOLDING MECHANISM

## NO ARTIFICIAL SWEETENERS.

One key difference between professional and consumer headphones? Many consumer models use EQ presets to artificially sweeten the sound. But as you might expect from headphones that carry the AKG<sup>®</sup> name, K 540 semi-open hi-fi headphones deliver the lifelike, flat-response voicing that music professionals insist on: You'll hear your favourite music the way your favourite musicians intended for it to sound. With a lightweight design and 2-D axis folding mechanism, the K 540s make it easy to enjoy realistic hi-fi sound anywhere.
